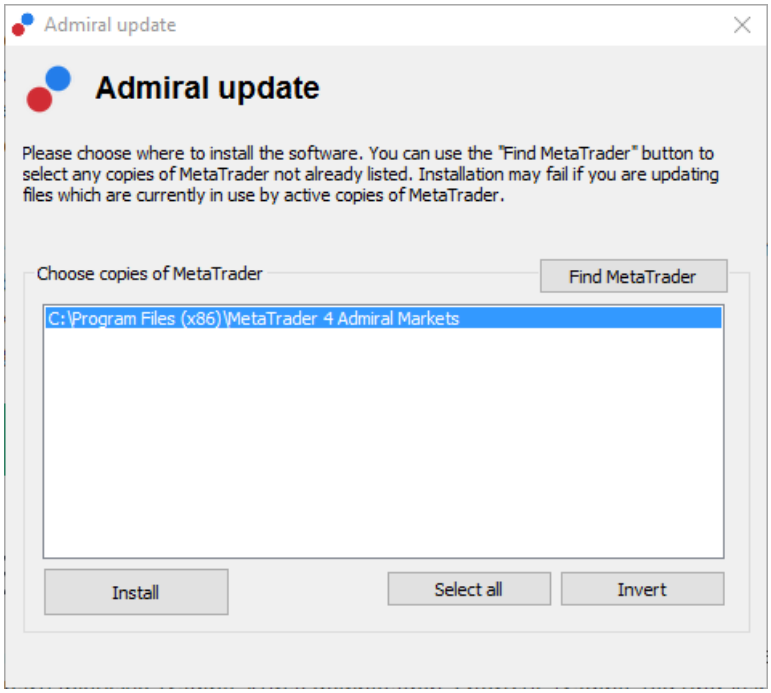
MT Supreme Edition Trading Central indicators

In this manual, you will find installation and usage instructions for MT4 & MT5 Supreme Edition. The installation process and usage is the same in both versions.

1. Opening the Trading Central indicators

Download MT Supreme Edition, making sure MetaTrader 4/5 is closed during the installation process. If you have installed multiple MetaTrader 4/5 versions on your system, you can find the correct installation folder manually with the *Find MetaTrader* button

Follow the instructions until the installation finishes, then start MetaTrader 4/5 again.



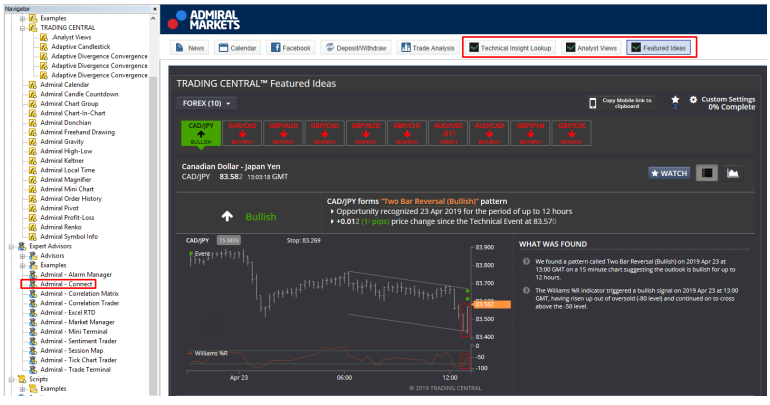
Note that, at this point, MT Supreme Edition functionality is only compatible with Windows.

To open the Trading Central indicator, you:

> Open a new chart or click on an existing one in MetaTrader 4 or 5 (MT4/MT5), and
> Find *Admiral - Connect* in the list of Expert Advisor (EA) functions in the Navigator window.

Now either:

> *Double-click* it, then drag it onto the chart, or
> *Right-click* it before choosing *Attach to a chart* from the context menu.



You can then select your favourite feature in the upper toolbar of the Admiral - Connect tool.

Note that you can only run one EA per chart in MT4 & MT5. If an EA is already running on a chart, then adding Admiral - Connect will replace the existing EA.

To run more than one EA, simply open more than one chart.

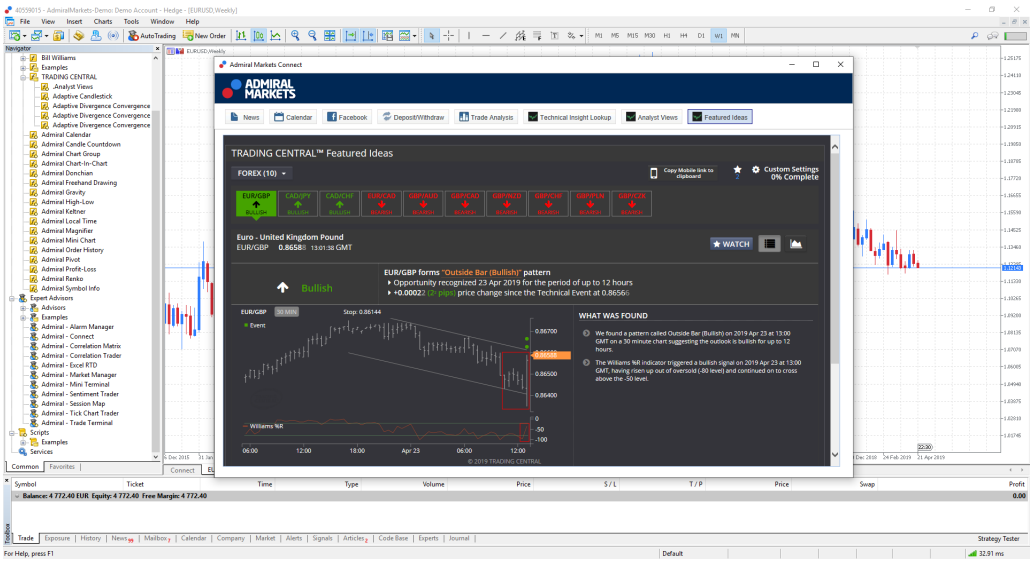
Additional technical indicators can be found in the Indicators section in MT4 and MT5 Navigator. You can choose to use the following indicators:

1. Analyst View
2. Adaptive Candlestick
3. Adaptive Divergence/Convergence Lines & Oscillators

2. Using Trading Central indicators

2.1. Forex Featured Ideas™

The Forex Featured Ideas™ indicator delivers a universe of unbiased, intraday trading ideas detected by Trading Central`s award-winning technical analysis pattern recognition.Tailor ideas to your preferred currency pairs, holding timeframes and technical analysis methods with our automated and personalised settings.Time your trades and monitor your portfolio easily, with our updates whenever a significant Technical Event® occurs.



1. Welcome to the landing page

Here you'll find actionable trade ideas detected by our award-winning technical analysis pattern recognition!

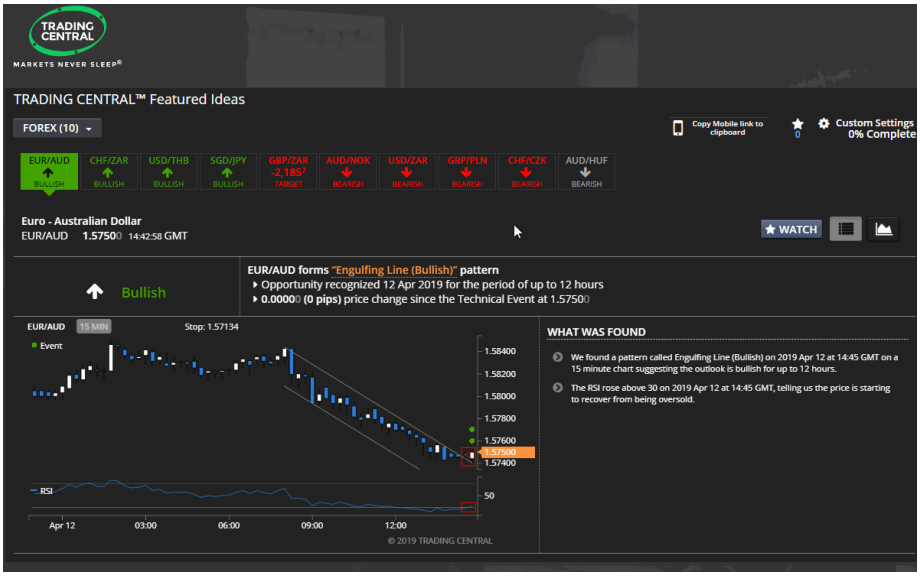
2. Customise your settings for personalised ideas

Customise the filters so you only receive ideas that match your unique trading style and interests. Select your favourite currency pairs, holding timeframes, pattern types and more!



3. Learn about Technical Analysis

Each idea offers a transparent commentary on why this idea was shown and what the technical events mean for the price. Hovering over the pattern will teach you about that technical patterns and "watching" an idea will allow you to keep track of how it performs so you can make a confident, educated decision next time you see that pattern.

2.2. Technical Insight™

Technical Insight™ combines actionable, technical analysis on virtually every financial instrument, to help investors optimise their trading strategies. Through a balanced feature set of detailed, proactive analytics, educational guidance and customisable options, Technical Insight™ empowers investors of all skill levels to take control of their investments.

1. Building Confident Investors

Each Technical Event® includes educational commentary and other data about the event and its expected impact on price action.

Investors can continue to learn about any instrument through “Learn more” and “View Historical Events” buttons. This progressive disclosure of information allows new investors a jumping off point to begin trading and the ability to continue learning on their own pace.

2. Concise Support, when it’s needed.

Technical Summary Score is the little analytic making big changes to how investors interact with the rich information in Technical Insight™.

No need to sift through details before making a decision... the Score delivers a concise technical outlook across three timeframes. Using a proprietary weight-of-evidence approach, the Score displays the directional outlook of either bullish, bearish or neutral, across short- to long-term timeframes, to provide simplistic support in the moment it's needed.

Technical Events covered:

Technical Insight™ patented pattern recognition is paired with the industry's largest library of technical analysis including classic patterns, candlesticks, Elliott Wave and indicators like Bollinger Bands and MACD. This allows you to analyse virtually every publicly traded financial instrument including stocks, ETFs, indices, foreign exchange and futures.

Explore the different chart patterns we cover and their implications on an instrument`s price below:
